April 1, 2004

Dear 2003 Annual Report Recipients:

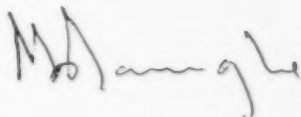

This is to advise you that there is an error on a map in the printed version of the 2003 Annual Report. This map in question is the most critical one in view of current interest in the mountain pine beetle situation. Please note:

Erratum: Page 13: Figure 4 legend – the circle indicates absence and the square indicates presence of beetles.

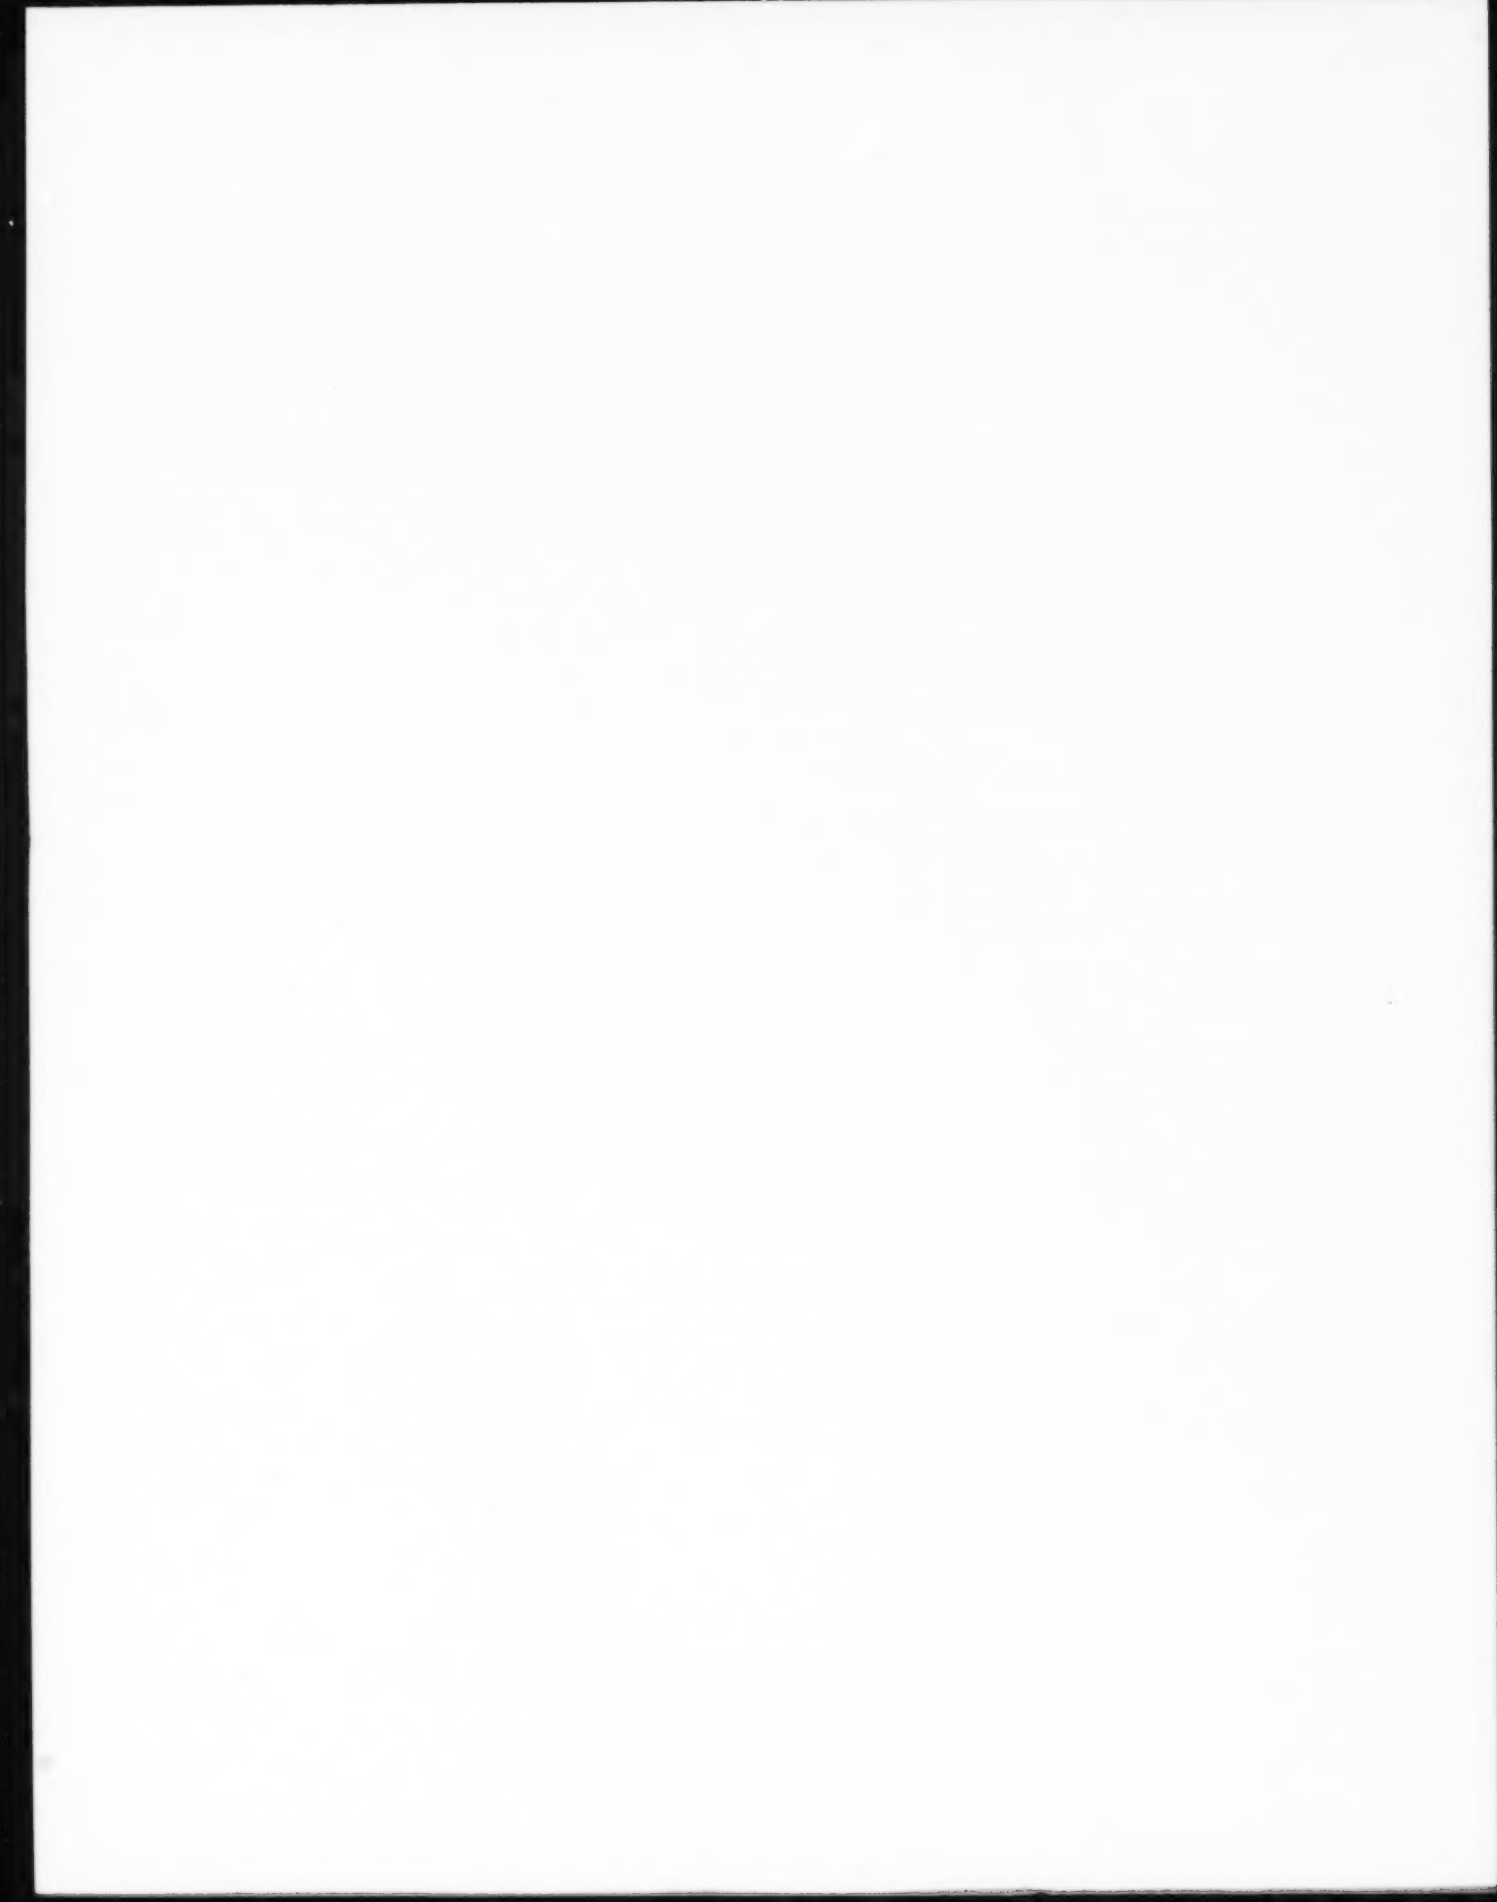

This error has been corrected in the online version located at:
http://www3.gov.ab.ca/srd/forests/health/p_reports.html.

We apologize for any inconvenience this may have caused.

Sincerely,

Sunil K. Ranasinghe
Entomologist
Forest Health Section

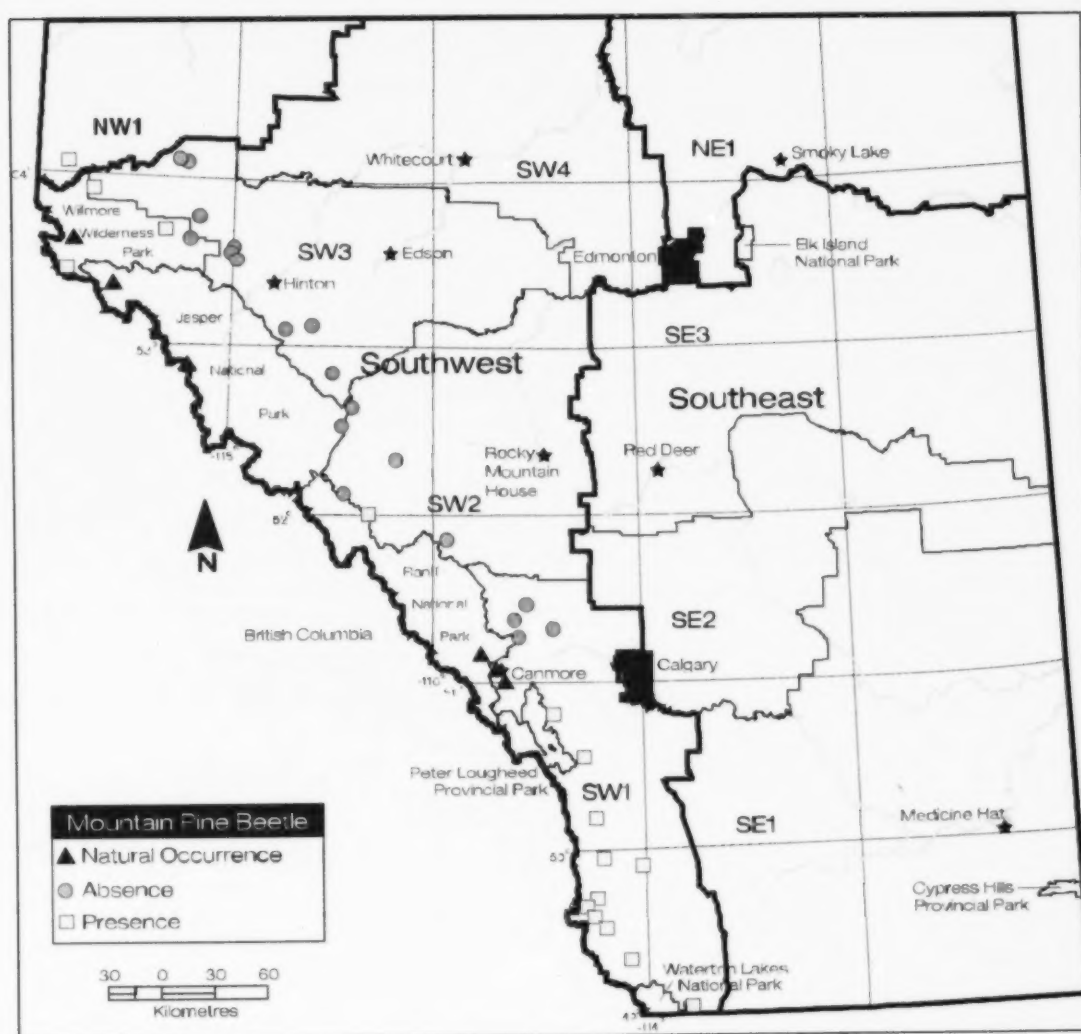

Figure 4 - Natural occurrence of mountain pine beetle infestations and presence/absence of beetle-hits in pheromone-baited plots in Alberta, 2003.
